

# Hazard Curves

## DATASET #1

(manually entered XY data)

Data from USGS website for SA 0.2 for site  
34.0852 , -118.1421

## DATASET #2

(manually entered XY data)

Averaged data for 4 attenuations:

SadighEtAl-1997

AS1997

BJF-1997

CB2003

for IMT being SA 0.2 for Site

34.0852 -118.1421 with Vs30 being 760

ERF being Frankel-2002 with rupoffset-1.0

Background included and treated as finite.

These are annualized rates generated using

OpenSHA IM\_EventSetCalc application
